

# MCMASTER EVIDENCE-BASED CLINICAL PRACTICE WORKSHOPS

Monday June 4<sup>th</sup> to Friday June 8<sup>th</sup>, 2018

## Come to experience the BEST in Evidence-Based Health Care Education at McMaster University!

McMaster University, the birthplace of Evidence-Based Health Care, is hosting two closely related workshops. McMaster continues to lead the world in innovation and advances in EBHC and Teaching. We have developed a cadre of the best EBHC educators from North America and world-wide who return to the workshop each year for the stimulating and educational environment.

The workshop is aimed at Clinicians, Physicians, Nurses, Pharmacists, Occupational and Physiotherapists, Dentists, Naturopaths, Chiropractors and Other Health-Care Professionals.

- Bothstreams: To help participants advance their skills in critically appraising the literature, and their skills in acknowledging and incorporating values and preferences in clinical decision making.
- Improve Your Practice / Fundamentals of EBCP stream: To acquire an understanding of common epidemiological concepts (e.g. interpreting hazard ratios, confidence intervals, critical appraisal of a systematic review) and advance their skills in using the literature for quality assurance, improving practice, and judging comparative effectiveness of health care interventions.
- Learn How to Teach / Teaching stream: To help participants learn how to teach EBCP using a variety of educational models in different settings, with different types of learners.

**Gordon Guyatt, MD (McMaster), MSc (McMaster) FRCPC**  
Distinguished Professor, Department of Health Research  
Methods, Evidence and Impact

**There is still space available!**
