3. Can EPAs be used for clinical tasks and non-clinical tasks?

- Both clinical and non-clinical tasks, such as quality improvement, teaching and scholarly work are considered to be essential tasks of a specialty and require an element of entrustment, and therefore are eligible for EPAs.

- Royal College EPAs are defined as tasks that involve multiple CanMEDS roles, emphasizing competencies in all areas of medical practice: Professional, Communicator, Collaborator, Leader, Health Advocate, Scholar and Medical Expert.
