News & Events

**N2 Canada Eastern Regional Meeting**

N2 Canada is holding its Eastern Regional Meeting on **November 27, 2019** at HHS/PHRI. N2 Canada, is a not-for-profit incorporated organization and an alliance of Canadian research networks and organizations working to enhance national clinical research capability and capacity. It promises to deliver great discussions from Health Canada, an Investigator’s Perspective on Audit Inspections, How to Implement N2 Standard Operating Procedures Toolkit for Clinical Research, and more. You can [register here](#) for the N2 Eastern Regional meeting.

**MITACS – leveraging partner funds to source funds for trainees**

While the MITACS program has been around a long time, it has undergone some significant changes to both programs and structure, and it is an underutilized source for funding trainee experiences. Consider leverage your existing partnered funding to apply for added funds for trainee management, travel and collaborative programs. Ongoing applications, simplified submission procedures, and high success rates!

- Eligible partners include companies (anywhere in the world!) and not-for-profits (Canada)
- Get funding for projects big or small (4 months to 4 years or longer)
- Funding includes both stipends and research expenses

**Mitacs Industrial Postdoc Accelerate Program**

The Mitacs Accelerate industrial postdoc provides 1, 2 or 3 years of funding – valued at $55,000 per year - for a postdoctoral fellow in any discipline. This special initiative offers better leveraging than standard Mitacs Accelerate internships.

Postdoctoral fellows partner with a company or not-for-profit organization and build a longer-term research collaboration.

Companies and organizations gain a competitive advantage by adding a highly-skilled member to their teams while postdoctoral fellows apply their expertise to real-world problems and build business-ready skills.

Apply from October 16th to December 6th, 2019.

**Access in-depth data free of charge to Make Your Impact on Childhood Cancer!**

Are you a researcher or do you know a researcher who may be interested in accessing in-depth data related to childhood cancer free of charge?
The Cancer in Young People in Canada (CYP-C) program of the Public Health Agency of Canada has recently released a new infographic on Canada.ca that may be of interest to you and/or your networks.

The new infographic provides an overview of how researchers can apply for and access in-depth data free of charge from the CYP-C program’s national surveillance and research database which contains detailed information about the diagnosis, treatment, and outcomes of every patient cared for by the 17 pediatric oncology centres in Canada from 2001 onwards.

If you have feedback or questions, please contact us at PHAC.chronicublications-chronique.ASPC@canada.ca.

New Frontiers in Research Fund
Exploration stream
All competition documents are available on the program website and the Convergence Portal is open. New this year, researchers at all career stages are invited to apply to the program. The objective of the Exploration stream is to generate opportunities for to conduct high-risk, high-reward and interdisciplinary research not available through funding opportunities currently offered by the three agencies.

Application Deadlines:
Applications at each stage will be submitted by the RGO (HRS/ROADS depending on PI’s primary departmental affiliation):
- Application stage, for those invited, has a deadline of December 10th, 2019 (at 8:00 PM eastern). Internal deadline is November 26th, 2019 at 12:00 pm (NOON).

2020-2021 Fulbright Canadian Research Chair Program
Fulbright Scholars are selected for their academic merit, leadership potential and interest in engaging with international scholars and communities. These grants support research with colleagues at institutions across the US. For a full list of Fulbright opportunities see the link here: https://www.fulbright.ca/programs/canadian-scholars/visiting-chairs-program

Eligibility for these awards, require the candidate to meet the minimum requirements mentioned below:
- Have Canadian citizenship (Permanent residence is not sufficient).
- Hold a PhD or equivalent professional/terminal degree as appropriate.
- Be proficient in English.
- Applications accepted until November 15, 2019
- For a more comprehensive overview of the application process, please access this link.

Fulbright Canada Research Chair in Public Health- Johns Hopkins University- US$25,000 for 4 months.

MIRA 2019 Funding
RESEARCH GRANTS
MIRA/LCMA Matching Funding for External, Competitive Funding Calls

Deadline: Rolling

Funding available: Matching funds up to $100,000

In order to improve the positioning of McMaster’s researchers in external funding competitions, MIRA and the Labarge Centre for Mobility in Aging have allocated funding that may be used to match or leverage external funds. This process is intended to be used for requests related to externally funded, peer-reviewed grant competitions that require a matching component. For more details, click here.

Compilation of GDPR Guidance Now Available
The Office for Human Research Protections has developed a new resource for IRBs, researchers, and sponsors that are involved in human subjects research in Europe. Titled Compilation of European GDPR Guidances, the document lists the data protection authorities of all European countries that fall under the new E.U. General Data Protection Directive (GDPR). For each country, the compilation also provides the links to any general GDPR guidances, as well as specific guidances on the topics of Research, Legal Basis, Consent, and International Data Transfer. The new Compilation is available here: https://www.hhs.gov/ohrp/international/index.html

**CIHR – Doctoral Research Award: Frederick Banting and Charles Best Canada Graduate Scholarships Doctoral Award**

The Canada Graduate Scholarship Doctoral (CGS D) program supports high-calibre students engaged in doctoral programs in all academic disciplines. This support allows scholars to fully concentrate on their doctoral studies, to seek out the best research mentors in their chosen fields and contribute to the Canadian research ecosystem during and beyond the tenure of their awards.

For detailed information, visit the [harmonized CGS D program page](#).

**Funding Details:** The maximum amount per award is $35,000 per year for up to three (3) years. Award funding is allocated as follows:
- Stipend: $30,000 per annum
- Research Allowance: $5,000 per annum

**Additional Details**

**Sponsor Deadline:** November 21, 2019

*To apply please contact [Graduate Studies](#)*

**CIHR – Masters Award: Frederick Banting and Charles Best Canada Graduate Scholarships**

The Canada Graduate Scholarships Master’s (CGS M) awards are intended to provide special recognition and support to students who are pursuing a Master’s degree in a health-related field at a Canadian institution. These candidates are expected to have an exceptionally high potential for future research achievement and productivity.

For detailed information, visit the [harmonized CGS M program page](#).

**Funding Details:** The total amount available for this funding opportunity is $9.45M, enough to fund approximately 540 awards. Trainee stipend: $17,500 for 12 months, non-renewable.

**Additional Details**

**Sponsor Deadline:** December 2, 2019

*To apply please contact [Graduate Studies](#)*
Mitacs: JSPS Summer Program
The Mitacs-JSPS Summer Program, offered in partnership with the Japan Society for the Promotion of Science (JSPS) provides opportunities for graduate students and postdoctoral fellows in Canada to pursue collaborative research in Japan, allowing them to advance their own research while promoting scientific progress in both Japan and Canada.

Funding Details: JSPS arranges round-trip airfare and insurance. Mitacs and JSPS provide an allowance for the student or postdoctoral fellow (equivalent to 534,000 yen in total). Host supervisors are eligible for a research support allowance.

Additional Details
Internal HRS Deadline: November 13, 2019
Sponsor Deadline: November 27, 2019

Canadian Blood Services: BloodTechNet Award Program
Through the BloodTechNet award, Canadian Blood Services supports the development of innovative educational projects that network the Transfusion, Cellular Therapy and Transplantation communities in Canada. These projects deliver educational tools and resources that support the development of skills, knowledge and expertise of the health professionals in this network.

Funding Details: The total budget available for the 2019 BloodTechNet Award Program competition is $50,000. The BloodTechNet Award Program competition will support projects with a proposed budget of up to $50,000. The number of awards funded will depend on the requested budgets and the recommendations of the review committee.

Additional Details
Internal HRS Deadline: November 15, 2019
Sponsor Deadline: November 29, 2019

Canadian Blood Services: Graduate Fellowship Program
Canadian Blood Services Graduate Fellowship Program provides stipend support for young investigators who want to initiate or continue training in the field of transfusion science. Graduate students undertaking full-time research training in a Canadian institution are invited to apply. The fellowship has a value of $25,000 per annum with an additional travel allowance of $1,000 per year of support. Students may be supported for a maximum of four years, with a requirement for successful renewal half way through the fellowship.

Funding Details: The maximum value of each Fellowship is $25,000 per annum, with an additional travel allowance of $1,000 per year of support. Students may be supported for a maximum of four years, with a requirement for renewal at year two.

Additional Details
Internal HRS Deadline: November 15, 2019
Sponsor Deadline: November 29, 2019

Canadian Blood Services: James Kreppner Award Program
The James Kreppner Award program supports legal and/or bioethical research relevant to Canadian Blood Services. Research priorities for the James Kreppner Award include the legal and/or bioethical aspects of (a) donation, collection, storage, and use of blood, blood products, and novel uses of hematopoietic stem cells; and (b) organ and tissue donation and transplantation.

Funding Details: One project with up to $50,000 for a period of one year.

Additional Details
Internal HRS Deadline: November 15, 2019
Sponsor Deadline: November 29, 2019

The Klarman Family Foundation: Eating Disorders Research Grants Program
The fundamental aim of this grants program is to understand the biology underlying the psychiatric disease anorexia nervosa, with the goal of accelerating progress toward prevention and treatment. We fund grants to academic researchers for 1 – 3 year projects to research the biology of this disease, and the questions of how and why it develops and persists. We encourage approaches that incorporate neurobiology with an up-to-date understanding of the symptoms and dysfunction associated with anorexia nervosa.

Funding Details: Up to $750,000 over 1 - 3 years.

Additional Details
Internal HRS Deadline: November 25, 2019
The Michael J. Fox Foundation: Edmond J. Safra Fellowship in Movement Disorders

Movement disorder specialists (neurologists with subspecialty training in Parkinson's disease and other movement disorders) serve as an important bridge between scientific advances in the lab and positive patient outcomes in the care setting. While the demand for movement disorder specialists is increasing, not enough neurologists are receiving this vital training. To address this unmet need, The Michael J. Fox Foundation (MJFF), in collaboration with longtime partner the Edmond J. Safra Foundation, introduced The Edmond J. Safra Fellowship in Movement Disorders. By funding academic centers to train new movement disorder clinician-researchers, this program aims to develop a network of highly trained specialists to be the next generation of leaders in Parkinson's research and clinical care.

The program grants funding directly to academic centers, which then must identify and train a new movement disorder fellow over a two-year period. Grant support cannot be used for a fellow already enrolled or selected. The Edmond J. Safra Fellowship in Movement Disorders is open to academic centers worldwide; previously awarded centers qualify to apply.

Funding Details: $90,000 per year.

Additional Details

Internal HRS Deadline: November 29, 2019
Sponsor Deadline: December 13, 2019

Alex’s Lemonade Stand: Epidemiology Grants

Epidemiology awards will support investigators pursuing research studies in human populations using epidemiological approaches, in order to significantly contribute to the understanding of childhood cancers.

This grant mechanism is designed to support hypothesis-driven research that focuses on the epidemiology, early detection and prevention of childhood cancer or comparative effectiveness and outcomes research related to detection, prevention, and treatment.

Funding Details: $100,000 per year for two years for direct costs.

Additional Details

Internal HRS Deadline: December 2, 2020
Sponsor Deadline: December 16, 2020

Alex’s Lemonade Stand: Young Investigator Grants

The Young Investigator grant is a 3-year award designed to support scientists in the early stages of their research careers, such as postdoctoral or clinical fellows. Outstanding mentorship and demonstration of a career plan that shows commitment to pediatric cancer investigation are critical components of a successful application.

Funding Details: Up to $150,000 over three years. A maximum of $50,000 in total costs will be awarded to applicants annually.

Additional Details

Internal HRS Deadline: December 2, 2020
Sponsor Deadline: December 16, 2020

President’s Awards for Community Engaged Scholarship

The President’s Awards for Community Engaged Scholarship will be available to teams with a minimum of one (1) faculty member and one (1) representative of a community group who have demonstrated a commitment to initiating and supporting excellence in community-campus research initiatives. The definition of Community Engagement used to evaluate submissions includes:

- Valuing the expert knowledge and passion that members of the community have about their communities and issues affecting them
- Fostering ongoing collaboration between University and community partners on how to better understand and consider the issues identified as priorities by local communities
- Performing research, teaching and service with community members and partners for the public good within the local community

Community representatives may be from the public, not-for-profit, private sector, or from a grassroots community group, as long as the overall initiative meets the definition of Community Engagement, defined above. Initiatives must be established and in existence for a minimum of one (1) year.
Funding Details: The award will include a $10,000 grant towards furthering a specific community engaged research project.

Additional Details available by contacting Ashley Shinde in the Office of Community Engagement at community@mcmaster.ca

Internal HRS Deadline: December 6, 2019
Sponsor Deadline: December 20, 2019

Social Sciences and Humanities Research Council (SSHRC) Connection Grants

The Social Sciences and Humanities Research Council of Canada (SSHRC) is now accepting applications for the Connection Grants competition. SSHRC has established the following deadlines for Connection Grant competitions: February 1, May 1, August 1, and November 1. Connection Grants support events and outreach activities geared toward short-term, targeted knowledge mobilization initiatives. These events and activities represent opportunities to exchange knowledge and to engage on research issues of value to those participating. Events and outreach activities funded by a Connection Grant may often serve as a first step toward more comprehensive and longer-term projects potentially eligible for funding through other SSHRC funding opportunities.

Funding Details:
- Connection Grants supporting events are valued at $7,000 to $25,000 over one year.
- Connection Grants supporting outreach activities are valued at $7,000 to $50,000 over one year. SSHRC is willing to consider amounts higher than $50,000, although such applications must satisfactorily justify the need for the higher amount, as well as provide evidence the entire award can be managed within the one-year timeframe.

Additional Details
Notify ROADS of Intent to Apply: December 16, 2019
Draft Application Due to ROADS: January 10, 2020
Final Application Due to ROADS: January 24, 2020
Sponsor Deadline: February 3, 2020
*To Apply, Contact Christina Pellegrini, Senior Advisor, Development, ROADS at pellegrc@mcmaster.ca or extension 27207*

Cancer Research Society 2020 Operating Grants

Awarding operating grants annually is the principal means by which the Cancer Research Society fulfills its mission to support fundamental, early translational and environment-cancer research in the broad field of cancer to contribute to the advancement of science aimed at preventing, detecting and treating this disease. The Cancer Research Society Operating Grants Competition is open to researchers across Canada.

Funding Details: $60,000 per year for 2 years.
75th Anniversary Special Grants - $150,000 over 5 years

Additional Details
LOI Deadline: December 4, 2019
Internal HRS Deadline: January 29, 2020
Sponsor Deadline: February 12, 2020

Society of Facioscapulohumeral Muscular Dystrophy: Research Grant

The FSH Society offers grants, research fellowships and postdoctoral fellowships to support research relevant to understanding the molecular genetics and cause of Facioscapulohumeral Muscular Dystrophy (FSHD).

The general areas of interest include tissue, cell and molecular biology studies of FSHD, the development of animal models for FSHD, biomarkers and outcome measurements, and clinical trial readiness.

Proposals are sought for research that helps with understanding of the genetic, pathophysiological, neuromuscular and developmental mechanisms of the disease. There is also interest in the development of cell, small-molecule and gene therapy, genomic engineering technologies and other therapeutic programs that may arise from that understanding.

Please submit a single-page introductory cover letter plus a one- or two-page descriptive summary of the proposed research—enough for a decision from the Scientific Advisory Board. The letter of intent may be submitted at any time to the FSH Society, Attention: Dr. David Housman, Scientific Advisory Board Chairman, FSH Society, 450 Bedford Street, Lexington MA 02420. Email the letter to daniel.perez@fshsociety.org.
National Multiple Sclerosis Society: Pilot Research Grants

The Society funds high-risk pilot grants to quickly test novel ideas. Funding is provided for one year to test innovative, cutting-edge ideas or untested methods, and to gather sufficient preliminary data to apply for longer-term funding. We welcome applications for studies related to multiple sclerosis that may serve to advance our mission of stopping MS progression, restoring function and improving quality of life, and preventing MS. The Society supports fundamental as well as applied studies, non-clinical or clinical in nature, including projects in patient management, care and rehabilitation.

Funding Details: $7,500 - $125,000 for 1 year (an average award is approximately $57,500).

Additional Details

Sponsor Deadline: Applications are being accepted on a rolling basis February 28/29 and August 31 annually.

Alex's Lemonade Stand: RUNX1 Early Career Investigator Grant

The key objective is to promote the establishment of a new generation of translational and clinical researchers interested in tackling inherited hematologic malignancy predisposition disorders with a focus on RUNX1-familial platelet disorder. We believe that providing capital to early career investigators not only injects funding to where it is needed most, but also cultivates a new cohort of investigators who will be invested in an area of research that historically has had limited attention.

The RUNX1 Early Career Investigator grant is a 3-year award designed to fund research in strategies leading to the development of therapies to prevent the transition from pre-leukemia to leukemia for patients with RUNX1-FPD. Collaboration and data sharing are a priority for this research program. The RUNX1 Research Program and ALSF host an annual scientific meeting that brings together grant recipients and other scientists. Grant recipients are expected to present their progress as part of the annual review.

Funding Details: $180,000 over 3 years (maximum $60,000 per year may be requested).

Canadian Cancer Society: Travel Awards

A limited number of Travel Awards to PhD or MD/PhD students, and post-doctoral/medical/clinical fellows are available. The purpose of this program is to defray the travel costs associated with making a scientific presentation as a first author or presenter at a conference, symposium or other appropriate professional meeting.

Funding Details: It is anticipated that up to 10 Travel Awards will be awarded in each competition (30 awards per year).

Note: Eligible expenses include: 1) Conference registration fees; 2) Accommodations; and 3) Transportation, and will not exceed $2,000.

Additional Details

Sponsor Deadline: Applications are being accepted on a rolling basis June 27, September 26 and December 26 annually.

Canadian Cancer Society: Junior Investigator Grant Panel Travel Award

Application guides can be found on the EGrAMS documentation for applicants page.

The Canadian Cancer Society is pleased to offer a special initiative to allow junior investigators in cancer research to gain knowledge and understanding of the Canadian Cancer Society peer-review process. During the year, through different funding opportunities, applications spanning all disciplines of cancer research are evaluated and ranked for funding.

Selected investigators from across Canada will be provided funds to reimburse travel costs to Toronto to observe a grant panel meeting. This unique opportunity will provide junior faculty members with an “inside look” at how research grants are reviewed in order to help structure their own grant proposals in future.

Eligible applicants are investigators in cancer research at the end of their Post-doctoral fellowship or within the first few years of their academic appointment. Priority will be given to those who have yet to be awarded a grant from a Canadian granting agency. Applications for these limited funds will be accepted via EGrAMS and require Department or Institution Head sign-off prior to submission.
Please view the list of current grant panels for more information on available panels.

Additional Details
Sponsor Deadline: Applications are being accepted on a rolling basis.

SickKids Foundation: Community Conference Grants
The objective is to bring together families with researchers and clinicians for medical presentations, workshops, symposia and family-oriented discussions. The conference helps to ensure families receive access to the most up-to-date information regarding their children's health. The grant will support events which are organized by and/or for families with children with health challenges, including, but not limited to children with acute illness, chronic illness and disabilities.

Funding Details: Awards are limited to an annual maximum request of $5,000. The Foundation will fund a maximum of three consecutive annual events organized by any single organization.

Additional Details
Sponsor Deadline: Applications are being accepted on a rolling basis January 31, May 31 and September 30 annually.

Cancer Research Society: Translational Research Partnership Program
The Translational Research Partnership Program supports collaborative projects in cancer research to help accelerate the development of new treatments and/or technologies for the benefit of patients. Our Translational Research Partnership strategy is bold and ambitious. We aim to break down the boundaries between research disciplines, which may include researchers from non-cancer backgrounds, in order to find innovative solutions to prevent, detect and treat cancer. We partner with a range of organizations to maximize the impact of research on patient outcomes.

Projects must meet the following conditions:
- Be translational research and may include clinical trial studies
- Basic research projects are out of scope
- Aim the development of a therapeutic and/or novel technologies
- Have excellent preliminary data to support the proposed project

The research team must consist of at least one principal investigator and one co-investigator. The inclusion of a variety of non-cancer disciplines is encouraged to drive the development of novel technologies and to take thinking from other fields that have not yet been applied to cancer.

All projects are evaluated based on the following criteria:
- Scientific excellence and innovativeness of proposed project
- Expertise of the multidisciplinary team
- Quality of preliminary data and feasibility
- Financial partner’s engagement
- Anticipated benefits for cancer patients

Funding Details: A maximum of $1,500,000 over up to 3 years per project of which up to 50% may come from the Cancer Research Society

Additional Details
Sponsor Deadline: Applications are being accepted on a rolling basis.

HHS: Clinical Health Professional Travel Awards
The Clinical Health Professionals Research Travel Award provides support for eligible non-physician Health Professionals to present their work at a scientific meeting of relevance to their practice/research.

Funding Details: Up to six awards on a competitive basis will be given within a calendar year, and are each valued up to a maximum of $2,500 for a national conference or $3,500 for international (funds in Canadian dollars).

Additional Details
Sponsor Deadline: Applications are being accepted on a rolling basis.

This funding program is led by Dr. Sandra Carroll, Director, Clinical Health Professional Research, carroll@mcmaster.ca. Interested candidates are recommended to contact Dr. Carroll or Daniela Bianco biancdn@hhsc.ca in advance of their submission. Please send inquiries to Donna Catherwood, catherwood@hhsc.ca.
The Ontario HIV Treatment Network (OHTN), Endgame Funding Program: Community-Based Research and Evaluation (CBR&E) Awards

The OHTN Community-Based Research & Evaluation Fund (CBR & E Fund) is designed to help achieve the mission of the OHTN; to improve the health and well-being of people living with and at risk of HIV in Ontario, through a network that promotes research and evidence to drive change. The CBR & E Fund will assist communities by supporting both the production and discovery of knowledge through community-based research, and the use of evidence to drive programming through participatory program evaluation.

OHTN is committed to funding scientifically rigorous, community relevant research that will have a short-to medium-term impact on those most affected by HIV in Ontario:

- People living with HIV/AIDS
- Gay men and other men who have sex with men, including gay, bi, and queer trans men, youth and newcomers
- African, Caribbean and Black men and women, including youth
- Aboriginal men and women, including youth
- Men and women who use drugs
- Women, including trans women, who are at risk (e.g. have unprotected sex or share drug equipment with people from the populations listed above)

The CBR & E fund will provide grant support to eligible community-initiated HIV research and evaluation projects that explore questions of importance to community-based organizations, and have the potential to have a meaningful impact on those most affected by HIV in Ontario in the next 2-5 years.

**Funding Details:** $25,000 to $50,000 for 1 year.

**Additional Details**

**Sponsor Deadline:** Applications are being accepted on a rolling basis March 1, June 7, September 6 and December 6, 2019.

Ontario Brain Institute (OBI): Event Funding Program

The Ontario Brain Institute (OBI) is committed to working together with brain health-related organizations in order to increase the capacity of their work in Ontario. The program especially looks to support events that embody OBI’s principles of integration and collaboration.

**Funding Details:** Up to $5,000.

**Additional Details**

**Sponsor Deadline:** Applications are being accepted on a rolling basis in January, May and September.

Crohn’s & Colitis Foundation: IBD Ventures

Is your organization engaged in the discovery or development of a novel product with the potential to help patients with inflammatory bowel diseases? If so, we want to hear from you!

The Crohn’s & Colitis Foundation seeks to accelerate the development of products that aim to improve the quality of life of patients with inflammatory bowel diseases. Toward that end, the Foundation has launched IBD Ventures, a new program and dedicated funding mechanism to support product-oriented research and development. Companies and academic investigators can apply.

**Funding Details:** Up to $500,000 per project per year will be considered. In addition, funded programs will be offered accelerator resources and advising.

**Additional Details**

**Sponsor Deadline:** Applications are being accepted on a rolling basis.

Ontario Genomics: Genomic Applications Partnership Program (GAPP)

The Genomic Applications Partnership Program (GAPP) funds downstream research and development (R&D) projects that address real world opportunities and challenges defined by “Receptor” organizations such as industry, government, or not-for-profit entities. These organizations should be committed to commercializing or implementing the outcomes of the project.

Projects are led by the Receptor organization (Canadian or international) but are active collaborations with a Canadian academic researcher. These projects are co-funded by Receptors and other stakeholders and must have the potential to generate significant social and/or economic benefits for Canada.

The GAPP aims to:
• Accelerate the application of Canadian genomics-derived solutions from academia to real-world opportunities and challenges defined by industry, not-for-profit and public-sector Receptors.
• Channel Canada’s genomics capacity into sustainable innovations that benefit Canadians.
• Enhance the value of Canadian genomics technologies by de-risking and incentivizing follow-on investment from industry and other partners.
• Foster mutually beneficial collaboration and knowledge exchange between Canadian academia and technology receptors.

**Funding Details:** 1/3 investment from Genome Canada, 1/3 provided by the Receptor partner (cash and/or in-kind) and 1/3 of other co-funding (non-Genome Canada). For more information see Section 9 and Appendix 2 of the [GAPP Investment Strategy and Guidelines](#).

**Additional Details**

**LOI Deadline:** Accepted on a rolling basis February 19, May 21, August 15.

---

**Weston Brain Institute Postdoctoral Scholars at Oxford**

The Weston Brain Institute Postdoctoral Scholars at Oxford program supports top-tier Canadian postdoctoral scholars by providing international training at the University of Oxford and affiliation with Merton College. Prior to submitting an application, candidates should independently identify a host lab and potential supervisor at the University of Oxford who agrees to supervise them if awarded. Awardees will receive salary support for their postdoctoral positions at Oxford.

**Funding Details:** £57,000 per year (£44,000 per year + benefits) for 2 years.

**Additional Details**

**Sponsor Deadline:** Applications are being accepted on a rolling basis, until 2 positions at a time are filled.

---

**Weston Brain Institute International Fellowships: Canada**

Neurodegenerative diseases of aging are among the least understood and most undertreated diseases today. If ignored, the social and economic costs of managing these diseases will continue to rise. Meeting these challenges requires pioneering approaches to accelerating treatments. The Weston Brain Institute is pleased to launch our International Fellowships: Canada program. The program will support top Canadian PhD students to travel to and work in world-renowned international labs for up to 12 months, to further their translational research on neurodegenerative diseases of aging.

**Funding Details:** $60,000 per year, prorated at $5,000 per month to fit shorter travel and specific project needs.

**Additional Details**

**Sponsor Deadline:** Applications are being accepted on a rolling basis.

---

**Alzheimer’s Drug Discovery Foundation: Prevention Beyond the Pipeline**

Consortium of Cohorts for Alzheimer's Prevention Action (CAPA): Epidemiological studies contribute unmatched information on whether the risk of dementia or cognitive decline may be influenced by long-term exposure to specific foods or supplements. However, high-powered studies are needed, ideally with dose, duration, and responder profiles, in order to translate epidemiological research into actionable interventions for testing. Through the CAPA Consortium, the ADDF funds collaborative analyses on dementia prevention using a minimum of five longitudinal cohorts, either harmonized or analyzed through parallel analysis of cohorts using a shared analysis script. More information [here](#).

Comparative Effectiveness Research: For many health conditions, physicians have a choice of clinically equivalent drugs. Some of these drugs are being investigated for repurposing to treat Alzheimer's or related dementias, due to potential disease-modifying properties that go beyond the treatment of their approved disease indication. The ADDF will consider funding research to generate an evidence base on whether choices in the routine clinical care of pre-existing conditions could protect from dementia. Priority will be given to the comparison of drugs that are otherwise clinically equivalent for the pre-existing condition (see Box 1 in the [ADDF 2016 position paper](#)). Methods may include randomized trials or epidemiology.

Cognitive Decline and Cognitive Reserve: Cognitive decline through aging and health conditions has been linked to an increased risk of dementia. The ADDF will consider funding programs to prevent and treat these conditions, including cognitive aging, menopause-related cognitive symptoms, postoperative delirium and postoperative cognitive decline, mild and/or repetitive traumatic brain injury, and chemotherapy-induced decline. Methods may include clinical trials or epidemiology.

**Funding Details:** $50,000 to $100,000 for epidemiological analyses based on scope of research. Up to $3 million for clinical trials based on stage and scope of research. For studies requiring additional support, co-funding from other funding agencies or investors is encouraged.
Alzheimer’s Drug Discovery Foundation: Drug Discovery Program
The Alzheimer’s Drug Discovery Foundation (ADDF) has long recognized the need to bridge the translational funding gap between early-stage drug discovery and clinical development for Alzheimer’s disease, related dementias, and cognitive aging by supporting promising therapeutic approaches.

The Drug Discovery RFP supports:
- Novel drug programs aiming to advance novel lead molecules to the clinical candidate selection stage. This includes small molecules and biologics (e.g., antibodies, peptides, gene therapies).
- Repurposed/repositioned programs aiming to build preclinical evidence in relevant animal models for repurposed drugs (existing drugs that are approved for other diseases and conditions) and repositioned drugs (existing drugs that have entered clinical trials for other indications and have not yet been approved).

**Funding Details:** $150,000-$600,000 based on stage and scope of research. For studies requiring additional support, co-funding from other funding agencies or investors is encouraged. One year with potential for follow-on funding. Multi-year proposals can be considered.

Additional Details
LOI Deadline: Accepted on a rolling basis January 18, April 12, July 12, October 11.
Sponsor Deadline: Accepted on a rolling basis February 8, May 10, August 9, November 8.

Alzheimer’s Drug Discovery Foundation: Neuroimaging & CSF Biomarker Development Program
Given the pathological heterogeneity of Alzheimer’s disease and related dementias, new biomarkers are needed to more accurately characterize specific underlying pathophysiology.

This RFP seeks to support the development of CSF and neuroimaging biomarkers for multiple contexts of use (see below) that include but are not limited to:
- Clearly demonstrate target engagement for novel therapeutics
  The development of biomarkers that can serve as measures of target engagement for novel targets such as neuroinflammation features (e.g. microglial activity, cytokine production, astrocytic activity), synaptic damage, metabolic activity, mitochondrial dysfunction, vascular health and epigenetic changes, among others, are of particular interest. High priority will be given to projects developing biomarkers that can be used in combination with therapies currently in development and serve as companion biomarkers.
- Detect signs of disease earlier and monitor progression
  We are seeking programs developing sensitive biomarkers that can detect disease earlier than currently available tests. This includes biomarkers that can predict and monitor conversion from cognitively healthy to mild cognitive impairment (MCI) or MCI to Alzheimer’s disease. We also seek prognostic markers that can predict rates of cognitive decline.
- More accurately diagnose and distinguish between dementia subtypes
  Many types of dementias can present with similar clinical features, and patients often show overlapping pathologies. At present, it is challenging to distinguish between dementia subtypes. Biomarkers that can distinguish between subtypes and stratify patients in clinical trials are of high priority.

**Funding Details:** $150,000-$600,000 based on stage and scope of research. Larger amounts will be considered for PET ligand development for regulatory or clinical work. For studies requiring additional support, co-funding from other funding agencies or investors is encouraged. One year with potential for follow-on funding. Multi-year proposals can be considered.

Additional Details
LOI Deadline: Accepted on a rolling basis January 18, April 12, July 12, October 11.
Sponsor Deadline: Accepted on a rolling basis February 8, May 10, August 9, November 8.
McMaster Institute for Research on Aging (MIRA), Canadian Longitudinal Study on Aging (CLSA):
Call for Proposals
The CLSA is a large, national, long-term study of more than 50,000 men and women who were between the ages of 45 and 85 when recruited. These participants will be followed until 2033, or death. The aim of the CLSA is to find ways to help us live long and live well, and understand why some people age in healthy fashion while others do not.

Researchers must notify Laura Harrington, Managing Director, MIRA, of their intent to apply for CLSA data access to be considered for MIRA funding. MIRA funds are allocated only to projects that do not have any other funding for this purpose.

MIRA membership is required to be eligible.

Data access applications are accepted three times per year.

**Funding Details:** MIRA can support access fees of $3,000 for a maximum 10 applications.

Sponsor Deadline: Ongoing

Please contact Audrey Patocs at patocsae@mcmaster.ca with intent to apply or any inquiries. Applications will be handled through the MIRA office.

McMaster Institute for Research on Aging (MIRA), Labarge Centre for Mobility in Aging (LCMA):
Matching Funds for Research Opportunities

The McMaster Institute for Research on Aging (MIRA) aims to optimize the health and longevity of the aging population through leading-edge research, education and stakeholder collaborations. The institute intends to amplify McMaster’s strength in aging-focused research through stimulating new partnerships, facilitating access to research funding, raising the profile of McMaster’s research platforms, and building capacity among students and faculty members. In order to improve the positioning of McMaster’s researchers in external funding competition, MIRA and the Labarge Centre for Mobility in Aging (LCMA) have allocated funding that could be used to match or leverage external funds. This process is intended to be used for requests related to externally funded, peer-reviewed grant competitions that require a matching component.

**Funding Details:** Maximum $100,000 (total cash and/or in-kind) non-renewable funding anticipated support 1-2 projects per year.

Additional Details

Sponsor Deadline: Ongoing

Please contact Audrey Patocs at patocsae@mcmaster.ca with intent to apply or any inquiries. Applications will be handled through the MIRA office.

MITACS Globalink Research Award
The Mitacs Globalink Research Award provides funding for senior undergraduate and graduate students, and postdoctoral fellows in Canada to conduct 12–24-week research projects at universities overseas. The following opportunities support travel and research from Canada to universities in:
Australia, Brazil, China, EU member countries: In France, both universities and Inria Research Centres are eligible host institutions, Israel, India, Japan, Korea, Mexico, Norway, Saudi Arabia, Tunisia, United Kingdom, United States.

**Funding Details:** $6,000 to conduct 12-24-week research projects at universities overseas.

Additional Details

Sponsor Deadline: Ongoing

MITACS Accelerate Fellowship
The Mitacs Accelerate Fellowship provides a long-term funding and internship option for master’s and PhD students. Recipients can also access professional development training that helps them ensure project success and gain in-demand career skills. Interested applicants can apply for the Accelerate Fellowship at any time. All other Accelerate program guidelines apply.

**Funding Details:**
- **Master’s students** - $40,000 total research award for 18 mos. Minimum intern stipend is $30,000 and partner organization contribution is $18,000
- **PhD students** - $80,000 total research award for 36 mos. Minimum intern stipend is $72,000 (24,000/year) and partner organization contribution is $36,000
Weston Brain Institute: Big Ideas

Neurodegenerative diseases of aging are among the least understood and most undertreated diseases today. If ignored, the social and economic costs of managing these diseases will continue to rise. Meeting these challenges requires pioneering approaches to accelerating treatments.

Based on success of previous programs, the Institute is expanding our support to new formats while maintaining the same mandate of accelerating the developments of therapeutics for neurodegenerative diseases of aging through translational research.

The Institute is considering supporting a large-scale, pivotal project to significantly advance research in our field. With this call, we are seeking to identify highly impactful ideas for consideration. Of particular interest are ideas that will establish Canada as the world leader in a particular area.

Goal: To support a large-scale, pivotal project that will significantly and sustainably advance research in the field of translational research on neurodegenerative diseases of aging.

Funding Details: From $5,000,000 to $20,000,000.

Weston Brain Institute: Early Phase Clinical Trials: Canada

Neurodegenerative diseases of aging are among the least understood and most undertreated diseases today. If ignored, the social and economic costs of managing these diseases will continue to rise. Meeting these challenges requires pioneering approaches to accelerating treatments. The Early Phase Clinical Trials: Canada program was created to provide funding support for clinical trials and clinical trial sub-studies that have excellent preliminary data. Eligible Principal Applicants must be at or above the level of Assistant Professor or equivalent and be affiliated with a Canada Revenue Agency-qualified donee institution located in Canada. Co-applicants and Collaborators must be at the post-doctoral level or above and can be working outside Canada.

An application requires the submission of a Letter of Intent which will be reviewed by our scientific review committee. Applicants with high potential projects will then be invited to submit a Proposal. Instructions for submitting the Proposal will be forwarded to those invited. Applicants can expect to receive the outcome of their LOI application approximately 2 months after submission.

Funding Details: A maximum of $1,500,000 per project over up to 4 years.

OCE Voucher for Innovation and Productivity II (VIP II) Program

The VIP II program helps established Ontario-based companies develop, implement and commercialize technical innovations by supporting partnerships with publicly-funded post-secondary institutions. Projects funded through VIP II address company needs by enabling the development of new products and/or processes, or facilitating productivity improvements, by leveraging post-secondary institutions’ skills and resources. Projects must ultimately help generate new revenues and create high-value jobs for Ontario companies. You can also leverage your sponsor’s contribution through the NSERC CRD program for additional research funds.

Funding Details: The VIP II program supports collaborations between companies and publicly-funded post-secondary institutions for durations of 12 and 24 months to a maximum of $150,000.

MITACS Accelerate Program

Canada’s premiere research internship program provides interns with the opportunity to transfer their skills from theory to real-world application, while companies gain a competitive advantage by accessing high-quality research expertise. Interns spend approximately half their time on-site with the industry partner; the remainder is spent at the university advancing the research under the guidance of a faculty supervisor. Not-for-profit organizations are eligible.
**Funding Details:** Funding starts at $15,000

**Additional Details**

**Sponsor Deadline:** Ongoing

**Natural Sciences and Engineering Research Council of Canada (NSERC) Alliance Grants**

NSERC is pleased to announce the opening of the next phases of Alliance grants.

On December 2, 2019, Alliance grants will be open for **Option 1** applications requesting over $30,000 annually from NSERC. Applications requesting between $20,000 and $30,000 annually from NSERC will be accepted beginning on December 11, 2019.

**Option 2** applications requesting support for up to 90% or 100% of the costs of the project will be accepted in early 2020. This component of the Alliance grants is intended for proposals that:

- aim at conducting natural science or engineering research that addresses an unmet societal need. This may include research affecting public goods, or that will address national or global issues that benefit more than a single or a few organizations, and where sources of funds are unavailable;
- connect partner organizations willing and able to overcome existing barriers to address these challenges and achieve results that can lead to a societal impact beyond economic benefits, and where an increased level of support from public funds is justified.

More details on the objectives and on the application and evaluation processes for **Option 2** will follow soon.

**Additional Details**

**Sponsor Deadline:** Ongoing
