

AFMC Student Portal Immunization and Testing Form

Undergraduate medical students applying for clerkship electives at other Canadian Universities are required to submit the **AFMC Student Portal Immunization and Testing Form** with their applications. For more information, see the AFMC Student Portal immunization page: <https://afmcstudentportal.ca/immunization>

The Health Screening Office completes the form for ALL first year students using information on the McMaster Year One Health Screening Record. No appointment is required and there is no charge to students for this service. Students should NOT download the form from the AFMC Student Portal. The Health Screening Office will contact students directly if additional information or clarification is required.

Completed forms are uploaded to MedSIS mid April (prior to MF4). Once the form is completed by the Health Screening Office, any additional requirements must be documented by another health care provider.

NOTE:

- * The form is completed assuming students with negative TB screening on their Year One Health Screening Record have not been exposed to active TB disease since the start of medical school. Students are required to report any exposure to active TB disease during their program to the Health Screening Office. For more information, see the [Post-Exposure TB Update Form](#) on the Health Screening website.
- * Students may submit the form if they are in the process of completing Hepatitis B immunizations and then resubmit the form with this section of the form updated by another health care provider.
- * Individual Universities may have additional requirements not included on the form, so it is important to check the Institution Profile on the AFMC Student Portal for each University where you are applying. Submit documentation separately only if required by the University where you are applying.
