This new McMaster interdisciplinary global health field course provides an integrated linguistic, cultural, historical, and public health experience in the Islamic North African country of Morocco.

Students are introduced to the determinants of health in the third world—the social, religious, epidemiological, economic, technological, legal, historical, and family issues that impact birth, pregnancy, women’s health, and the health of newborns and children. Students also learn about Islam, medical anthropology, and receive intensive language training in Moroccan colloquial Arabic.

- 6 units of McMaster University credits, can be taken as History, Language, Anthropology, and/or Bachelor of Health Science credits.
- Open to all McMaster undergraduate students of all faculties (Health Sciences, Social Science, Humanities, Science, Business, Engineering), level 2, 3, 4).
- No knowledge of foreign language necessary.
