

Pediatric Grand Rounds

Why is my patient anemic? Iron Deficiency for the Pediatrician

Iron deficiency is a common pediatric problem. In this talk, we will discuss the presentation, epidemiology, causes and treatment of iron deficiency. This will be done in part through discussions of patient case presentations.

DR. CHANTEL CACCIOTTI completed undergraduate training at The University of Toronto, moved to Dominica, West Indies where she completed medical school at Ross University, followed by clinical rotations in Miami and New York City. She then completed her pediatric residency in New York and has returned home and is currently in her pediatric hematology/oncology fellowship at McMaster University.
