Pediatric Grand Rounds

Pediatric Intestinal Failure: Microbes, the microbiome and mucosal immunity

Short bowel syndrome is the leading cause of intestinal failure in pediatrics. This presentation will highlight the complications of short bowel syndrome as well as highlight new research in the field of intestinal failure.

DR. JENNA DOWHANIUK is a Clinical Scholar in Pediatric Gastroenterology and Nutrition at McMaster University. She completed her medical training at McMaster University after three years of Applied Human Nutrition at the University of Guelph. At McMaster University, she completed her core residency program as well as her Pediatric Gastroenterology fellowship. She has a clinical interest in nutrition and intestinal microbiome applications in clinical gastroenterology.
