

Paediatric Emergency Medicine

Up to 5 two-week positions are available for Clinical Clerks wishing to complete an Elective in Paediatric Emergency Medicine during their August vacation.

Students will complete eight shifts in the Paediatric Emergency Department during their rotation. They will be responsible for performing histories and examinations on acutely presenting Emergency Department patients, and presenting their findings directly to supervising Staff Physicians. There will also be the opportunity for students to be involved in the management of severely unwell and injured children. Further educational opportunities arise through attendance at weekly Paediatric Emergency Medicine Academic Half Days.
