This message is for all Faculty of Health Sciences faculty and staff who reside in the Health Sciences Centre building:

There will be a scheduled power interruption on the west side of the Health Sciences Centre building on June 6 beginning at 7:30 a.m. for approximately 30 minutes, and at the completion of the project at 7:00 p.m. for 30 minutes. During this process, the normal power will be partially disabled. The facility will function as normal during the process with little affect to the occupants. The emergency power system will support the affected areas until the normal power is restored (refer to additional information below for more details of specific areas). Hamilton Health Sciences Engineering Department will be available if special arrangements or assistance is required. An overhead announcement will be made before and after the interruption.

Please note that only the West side of the building will be affected. This includes; Red and Purple sections floors 1, 2, 3 and 4, see below for a comprehensive list.

Additional Information:
- Red and Purple sections units/clinics/labs/ will lose regular lights during shutdown time; the emergency lights will support the affected areas during that time.
- Emergency power receptacles (red ones) in the building will work normally during shutdown time.
- Some areas may experience air flow reduction during shutdown time. All critical patient areas will operate as normal.
- All elevator banks will work normally during shutdown time.
