

## AFMC Student Portal Immunization and Testing Form

Undergraduate medical students applying for clerkship electives at other Canadian Universities are required to submit the **AFMC Student Portal Immunization and Testing Form** with their applications.

The Health Screening Office completes the form for ALL first year medical students at McMaster; no appointment is required and there is no charge to students for this service. Students should NOT download the form from the AFMC Student Portal. The Health Screening Office will contact students directly if additional information or clarification is required.

Completed forms are uploaded to MedSIS by the end of April (during MF4). Once the form is completed by the Health Screening Office, any additional requirements must be documented by another health care provider.

### Checklist before submitting the form:

1. Check over your form and contact the Health Screening Office if there are any errors and/or omissions.
2. Complete and sign Section A and any attached appendices.
3. Section F. Tuberculosis (TB):
  - \* Students with negative TST documented need to review the Recent TB Exposures questions in Section F3 and report any exposure to active TB disease to the Health Screening Office immediately. For more information, click on [TB Risk Assessment and TST Conversion](#)
  - \* Students with positive TST or other positive TB history documented need to attach Appendix B and the chest x-ray report provided.
4. Section H. Hepatitis B: Students in the process of completing vaccinations may submit the form with Appendix D attached, then resubmit the form with this section updated by another health care provider.
5. Section I. Influenza immunization: Annual immunization is required for electives occurring between November and June. You will need to have this section updated by another health care provider and resubmit the form if the vaccine is not yet available (e.g. if you submit an application in August for an elective the following January, you will need to have the vaccine in October and resubmit the form).
6. Individual Universities may have additional requirements not included on the form, so it is important to check the Institution Profile on the AFMC Student Portal for each University where you are applying. Submit documentation separately only if required by the University where you are applying.

### Submitting the form:

Instructions for submitting the form can be found on the AFMC Student Portal website:
