

Fellowship Program in Radiation Oncology

The primary objective of this 1-2 year fellowship is to provide training and research opportunities in technological advances in radiation therapy. Several streams are available for successful candidates in applications of IMRT, high dose rate brachytherapy, VMAT and stereotactic radiation therapy. Potential sites of interest include breast, prostate/kidney/bladder (GU), lung, esophageal, head and neck, gynecological, central nervous system, as well as bone and oligometastases. Training will also be provided in principles and methods of scientific research in the areas of clinical trials, health services, and translational research including technology evaluations in radiation oncology.

The Juravinski Cancer Centre provides radiotherapy to a large number of patients from Central West Ontario. Approximately 5000 new patients are seen yearly. The Centre is a leading accruer to radiation oncology clinical trials and works with a number of cooperative groups. The successful candidate would have the opportunity to work with multidisciplinary staff at the Ontario Clinical Oncology Group (OCOG) and participate in completed and ongoing trials.

McMaster University is renowned for its programs in translational, clinical research and clinical epidemiology and biostatistics. The one year clinical fellowship offers trainees with the opportunity to enroll in the Graduate Diploma in Clinical Epidemiology. The GDCE builds on the strengths of the internationally respected Health Research Methods (HRM) Graduate Programs in the Faculty of Health Sciences. Like the HRM program, the courses are taught by faculty in the Department of HE&I, a premier destination for graduate study and research in clinical epidemiology <https://fhs.mcmaster.ca/hrm/gdce.html>

The two year clinical research fellowship provides fellows with an opportunity to obtain a Master's in either Health Research Methodology; Health Policy; Health Science Education; or Medical Sciences within the Graduate Studies Programs offered at McMaster University. For more information on these programs please visit: <http://www.fhs.mcmaster.ca/grad/> and the Clinician Investigator Program <https://fhs.mcmaster.ca/cip/>

All qualified candidates are encouraged to apply. However, Canadian citizens and permanent residents will be considered first for this position. Applicants need not identify their country of origin or current citizenship; however, all applications must include one of the following statements: "Yes, I am a citizen or permanent resident of Canada" or "No, I am not a citizen or permanent resident of Canada". Foreign graduates who have completed formal radiation Oncology residency training and can obtain an educational license in Radiation Oncology in Ontario, work permit and visa may apply to this program.

The position is available July 1, 2019 and will be funded at the PGY6 level

Application requirements:

1. Complete Fellowship Application <https://fhs.mcmaster.ca/postgrad/documents/ApplicationForm-PGME112015.pdf>
2. Must be eligible for a CPSO License to practice in the Province of Ontario
3. Curriculum vitae – include information on teaching and research positions, list of publications, certificates, awards, scholarships, memberships, etc.
4. Three appropriate professional letters of reference, one from the Residency Program Director
5. Covering letter outlining personal learning goals and preliminary thoughts for development of a research/clinical project
6. Medical school transcripts

Please forward all **completed** documentation referenced above no later than **July 1, 2018** to:

Incomplete applications will not be accepted.
