## “Fetal CNS: A Systematic Review”

**Tuesday, March 31st, 2015**  
**St. Joseph’s Healthcare Hamilton**  
CAMPBELL Auditorium – Level 2 – Room T2202  
Juravinski Innovation Tower  
6:00 pm

### Objectives

1. Review normal fetal CNS anatomy and sonographic views.  
2. Review technique for accurate measurement of lateral ventricles.  
3. Describe a systematic approach for evaluating intracranial findings in the setting of ventriculomegaly to diagnose specific underlying abnormalities.  
4. Review selected CNS abnormalities using the described approach.

### Objectives

**Ectopic Pregnancy:**  
1. Discuss diagnostic criteria for evaluation of various adnexal findings in the setting of possible ectopic pregnancy.  
2. Discuss reporting considerations in the setting of inconclusive ultrasound and clinical findings.  
3. Review treatment options of adnexal ectopic pregnancy and unusual ectopic pregnancies.

**Non-Cardiac Fetal Thorax Evaluation:**  
1. Review factors necessary for normal thoracic development.  
2. Use a systematic approach to evaluate the fetal thorax.  
3. Review various anomalies and clues to reach a correct diagnosis.
