

Worker in a Hospital Building in a Laboratory Environment

A worker is a person who performs work or supplies services for monetary compensation.

NOTE: The information on this page does not apply to a Learner who is a student on a placement. Learners should consult the "FHS Learners" link http://fhs.mcmaster.ca/safetyoffice/fhs_learners.html

All workers have to participate in the safety education as required by McMaster University. Then they have to complete Fire Safety education as it relates to the building they work in. Additional safety education will relate to the type of tasks they perform. Finally, a worker must complete specific education sessions related to their role.

NOTE: The list you select will only list the basic education requirements. There may be other hazard-specific education requirements based on the hazard identifications for the work. There will be additional training requirements meant to bridge the education to the practical application of the information.

The McMaster University training matrix may identify this safety training. <http://www.workingatmcmaster.ca/eohss/training/matrix/>

Safety Education

The FHS WHMIS Update is no longer available. You now have to complete the WHMIS2015 course through Mosaic and Avenue to Learn. The course code is WHMS15.

Course Required	Frequency	Mosaic Course Number
Health and Safety Orientation	Once	HSORI
Slips, Trips and Falls	Once	SLPTRP
Ergonomics	Once	ERGON
Violence and Harassment Prevention	Every 3 years	VHPW
FHS Hospital Fire Safety	Annually	FHSFSF
FHS Code Awareness	Once	FHSCDA
WHMIS 2015 (online)	In 2017 & every five years	WHMS15
Chemical Handling and Spills	Every 3 years	CHEMHS
Asbestos Awareness (if present)	Once	ASBEST
Biosafety or FHS Routine Practices	Once	BSLTRA FHSRTP
Biosafety Update	Annually after initial training	BSUPD

Other courses may be required to work in the laboratory, discuss the following options with your

Training Record

You can access your Mosaic training record following these instructions: http://fhs.mcmaster.ca/safetyoffice/documents/ViawTrainingSummaryESS_JOBID.pdf

Other courses may be required to work in the laboratory, discuss the following options with your supervisor to determine which are necessary for your situation.

Course Potential	Frequency	Mosaic Code
Autoclave Awareness Training	Once	AUTOCL
Gas Cylinder	Once	GASCYL
Hydrogen Fluoride	Every 3 years	HFLTR
Laser Safety	Once	LASER
Lock Out Tag Out	Once	LCKTAG
Nanotechnology Awareness	Once	NANOAW
Radiation Safety	Once	Contact Health Physics
FHS TDG Infectious Substances	Every 2 years	FHSTDG

Accessing Your Training

This training is online through the Mosaic system. Your McMaster ID will allow you to sign in. To access the MOSAIC log in page please see: <https://epprd.mcmaster.ca/psp/preprpd/?cmd=login>

The Mosaic course number is provided in the chart on the left of the page. Step by step registration information can be found at: http://fhs.mcmaster.ca/safetyoffice/documents/SelfServiceTrainingEnrollment_JOBID.pdf

Your request will move to the Avenue to Learn web site overnight. <http://avenue.mcmaster.ca/> Your MACID will allow you to access the Avenue system.

The training can be completed the following day in Avenue and the result will transfer back to Mosaic overnight. If you are a student or an instructor for a course you may need to look under the heading "Continuing" to locate your MOSAIC training request.

The FHS Safety Office does not have access to training records held in the Mosaic system.
